

Les US peuvent-il se corriger avant de se détruire ?

.....Fisk's commentary was prophetic. Even without the gift of hindsight, he already understood that the events that were to follow the attacks were not about the "war of democracy versus terror that the world will be asked to believe"; but instead, about United States aggression, proxy wars and neocolonialism, which are hidden in plain sight from the average American

citizen. It was about "American missiles smashing into Palestinian homes," he wrote. "US helicopters firing missiles into a Lebanese ambulance in 1996, American shells crashing into a village called Qana..." All of these, Fisk predicted, would be overshadowed by a reductive narrative pitting the virtues of American democracy against Islamic aggression and "mindless terror....."
