

La comté de Los Angeles totalise 11 391 cas , dont la ville de Glendale a le plus de cas

Probablement dû à une culture des Arméniens venus d'Arménie (qui méconnaissent les dangers de la proximité dans le covid-19 , la ville de Glendale a le plus de cas : 310

LOS ANGELES – With 40 new deaths in the past 24 hours, and a total of 11,391 COVID-19 (Coronavirus) cases in Los Angeles County, the LA County Department of Public Health – Registered Environmental Health Specialist, Yeran Ayvazian, issued a message in Armenian today during the daily press briefing, urging the Armenian-American community to continue following safe practices to avoid getting infected along with updated statistical data.

To find out if you're eligible for a test and to schedule an appointment at a drive-up mobile testing site in Los Angeles County, please visit
